National Motor Figure Tells of Trade Conditions in

Alfred Reeves, general manager of the National Automobile Chamber of Commerce addressed the members of the Washington Automotive Trade Association at a special meeting of that organization at the City Club last night.

Mr. Reeves, who is probably one of the best posted men making a study of conditions in the automo-tive world took for his subject "The Automobile Deer and The Future," and during the course of his talk covered a wide range of subjects of vital interest to his audience. The accomplishments of the in

The accomplishments of the industry in the past were recalled and compared to those of today. Mr. Reeves showed that although the past season has not been a particularly prosperous one for automotive interests, the so-called slump has been much more pronounced in other industries and comparisons show that the automotive industry has held to an exceptional stability. signed for use in small towns that has held to an exceptional stability. still ranking second only to the steel industry in the amount of

capital invested and first in the

marketing of finished products.

The used car situation was thoroughly discussed and remedies proposed by the National Automobile hamber of Con merce explained. Mr. Reeves hopes that the national cham-ber may be able to assist dealers by materializing some of the proposed plans for dealers by materializing some of the proposed plans for relief so that dealers throughout the coun-try may put their used car transacions upon a more profitable basis.

Parking and the prevention of acci-

he industry. Mr. Reeves laid particular stress upon his remarks relative to automotive insurance conditions, excessive rates according to Mr. Reeves ar-being charged motorists who are already carrying more than their share of unjust taxes and other burdensome

SHIRLEY SHINES UP CAR TRAVEL TAX IN CANADA

Perhaps you think you know how to clean the family Ford, in preparation for rubbing fenders with its more aristocratic cousins, the Packard and others on the Sunday tour of the boulevards. Furthermore, your method may be fairly good, but Shirley Mason, the little "movie queen," has her own system of cleaning the car. We believe that Shirley must have had the benefit of some good

We believe that Shirley must have had the benefit of some good old-fashioned domestic training, for you will note that she employes the familiar household broom and makes a clean sweep of the job. Shirley is very fond of her Ford Sedan, and would employ only the best methods in caring for it. The moral, therefore, may be that the broom is the proper implement for thorough cleaning, although we imagine that the average Ford owner is hardly enough of an acrobat to be able to hop up on the car hood with the ease which is said to characterize Miss Shirley's car-cleaning operations.

Better Things.

When driving through muddy spots or a bad hole, always remember the siower the wheels turn the better the chance the car has of gripping the surface.

The best possible ways of putting smooth riding quality into an automobile are: Better roads, better tires, better springs, better shock absorbers and better upholstering.

· Is General Motors Discontinuing The Oakland?

The Answer:

OAKLAND MODELS STAND

President du Pont Says Changes May Be Made After 1922.

P. S. du Pont, President of the General Motors Corporation, has denied that the company was contemplating any change in the Oakland models in the immediate future. In a statement issued last night, Mr. du Pont says that "it is but natural that there should have been constant goss p during the past few weeks while automobile price revisions were under way. The policies of the General Motors Corporation with respect to certain of its manufacturing units were not immune, the future of Oakland being the subject of persistent rumers.

and being the subject of persistent rumors.

"This division is in a healthy condition, with its business stabilized and sales increasing. The present line of passenger cars, with general improvement, will be continued for the 1922 selling seasons. Thereafter, new models as may be required by the trade may be introduced." -New York Times, Sat., Nov. 19, 1921.
